

Foundation Banner Stand - Instructions

Step 1
Find 3 piece triangular section.

Step 2
Loosen screw with screwdriver and then tighten triangle section together.

Step 3
Repeat steps 1 and 2 for second 3 piece pole section. These 3 piece poles will make the width of the frame.

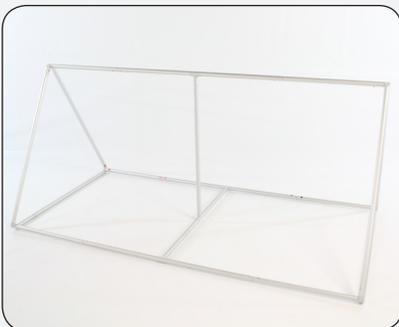

Step 4
Match identical shapes. Open to open and filled to filled until you create a triangle.

Step 5
Make sure the hole located middle of the frame at the top of the horizontal bar is facing directly down and bottom horizontal poles are facing each other.

Step 6
Support the frame with horizontal middle connector by snapping into place with the holes that are facing each other.

Step 7
Support the frame with Vertical middle connector by snapping into place with horizontal bar hole and top of the frame with the hole facing directly down.

Step 8
Install the graphic by looping bungees over frame and placing hook on each grommet.
